

KTH Electrical Engineering

# INTRODUCTION

This is a first slide of the presentation.

## NEXT SLIDE

KTH Electrical Engineering

This package is based on the `seminar` document class, which provides only very basic support for slides. In addition to the KTH logotype, the `KTHEEframe` package also adds a `\heading` command to specify a heading for each slide.

Note that it has to be processed with `latex + dvi2pdf` (or `latex + dvips + ps2pdf`). `pdflatex` or `dvipdfm` will not work.
